## 1. Revision History

Revision	Date	Description	Approved By
A	01/12/2018	Initial Release for ISO9001:2015	Carlos Garza

## 2. Introduction

Our organization has developed a Quality Management System to better satisfy the needs of its customers and to continually improve the overall management of the company.

The purpose of this manual is to document Keeprite Refrigeration's Quality Management System, define the Quality Policy and Objectives, instruct and guide employees, and define the controls implemented to assure product quality and customer satisfaction.

The quality system conforms to the requirements of the International Standard ISO9001:2015. It covers the major processes associated with our business as identified in Appendix E [Process Flow Map].

This Flow Map also shows the interaction of these processes, identifies procedures that detail how activities are performed, and identifies measuring methods for all processes so management can assure the system is functioning as intended.

## 3. Terms and Definitions

For the purposes of this document, the terms and definitions given in ISO9000:2015 apply.

## 4. Context of the organization

### 4.1. Understanding the organization and its context

Our organization determines external and internal issues that are relevant to our purpose and our strategic direction and that affect our ability to achieve the intended result of our quality management system.

Our organization monitors and reviews information about these external and internal issues as described in SOP-07 [Management Review].

### 4.2. Understanding the needs and expectations of interested parties

Due to their effect or potential effect on our organization's ability to consistently provide products and services that meet customer and applicable statutory and regulatory requirements, our organization sets forth Appendix F [Interested Parties] which defines:

- a) the interested parties who are relevant to our quality management system;
- b) the requirements of these interested parties that are relevant to our quality management system.

Our organization monitors and reviews information about these interested parties and their relevant requirements as described in Appendix F [Interested Parties].

### 4.3. Determining the scope of the quality management system

Our organization defines the boundaries and applicability of our quality management system, and has formally established our scope as:

#### ***"Design, Manufacture and Delivery of Commercial Refrigeration Equipment and Replacement Service Components"***

When determining this scope, our organization considers:

- a) the external and internal issues referred to in 4.1;
- b) the requirements of relevant interested parties referred to in 4.2;
- c) the products and services of our organization.

Our organization applies all the requirements of the ISO9001:2015 International Standard if they are applicable within the determined scope of our quality management system.

#### ***All requirements of the standard are applicable to our organization.***

The scope of our organization's quality management system (as stated above) shall be available and be maintained. It states the types of products and a service covered, and provides justification for any requirement of this International Standard that our organization determines is not applicable to the scope of our quality management system.

Conformity to this International Standard may only be claimed if the requirements determined as not being applicable do not affect our organization's ability or responsibility to ensure the conformity of its products and services and the enhancement of customer satisfaction.

## **4.4. Quality management system and its processes**

### **4.4.1. Quality Management System**

Our organization has established, implemented, maintains and continually improves our quality management system, including the processes needed and their interactions, in accordance with the requirements of this International Standard.

Our organization has determined the processes needed for our quality management system and their application throughout our organization, and:

- a) defines the inputs required and the outputs expected from these processes in Appendix E [Process Flow Map];
- b) defines the sequence and interaction of these processes in Appendix E [Process Flow Map];
- c) defines and applies the criteria and methods needed to ensure the effective operation and control of these processes as described in Appendix E [Process Flow Map] and in specific procedures related to each Core Process;
- d) defines the resources needed for these processes as described in Appendix E [Process Flow Map] and in specific procedures related to each Core Process and ensures their availability;
- e) assigns the responsibilities and authorities for these processes in Appendix E [Process Flow Map] and in specific procedures related to each Core Process;
- f) addresses risks and opportunities as defined in SOP-06 [Risk Management];
- g) evaluates these processes as described in SOP-03 [Internal Audit] and implements any changes needed to ensure that these processes achieve their intended results as described in SOP-05 [Corrective Action];
- h) improves the processes and the quality management system.

### **4.4.2. Documented Information**

To the extent necessary, our organization:

- a) maintains documented information to support the operation of its processes as described in SOP-01 [Document Control];
- b) retains documented information to have confidence that the processes are being carried out as planned as described in SOP-02 [Record Control].

## 5. Leadership

### 5.1. Leadership and commitment

#### 5.1.1. General

Top management shall demonstrate leadership and commitment with respect to our quality management system by:

- a) taking accountability for the effectiveness of the quality management system through engagement in the Management Review process as outlined in SOP-07 [Management Review];
- b) ensuring that Appendix A [Quality Policy] and Appendix B [Quality Objectives] are established for our quality management system and are compatible with the context and strategic direction of our organization;
- c) ensuring the integration of the quality management system requirements into our organization's business processes;
- d) promoting the use of the process approach and risk-based thinking;
- e) ensuring that the resources needed for our quality management system are available;
- f) communicating the importance of effective quality management and of conforming to our quality management system requirements;
- g) ensuring that the quality management system achieves its intended results;
- h) engaging, directing and supporting persons to contribute to the effectiveness of our quality management system;
- i) promoting improvement;
- j) supporting other relevant management roles to demonstrate their leadership as it applies to their areas of responsibility.

#### 5.1.2. Customer focus

Top management shall demonstrate leadership and commitment with respect to customer focus by ensuring that:

- a) customer and applicable statutory and regulatory requirements are determined, understood and consistently met as described in SOP-09 [Contract Review];
- b) the risks and opportunities that can affect conformity of products and services and the ability to enhance customer satisfaction are determined and addressed as described in SOP-06 [Risk Management];
- c) the focus on enhancing customer satisfaction is maintained.

## 5.2. Policy

### 5.2.1. Establishing the Quality Policy

Top management has established, implemented and maintains Appendix A [Quality Policy] that:

- a) is appropriate to the purpose and context of the organization and supports its strategic direction;
- b) provides a framework for establishing Appendix B [Quality Objectives];
- c) includes a commitment to satisfy applicable requirements;
- d) includes a commitment to continual improvement of the quality management system.

### 5.2.2. Communicating the Quality Policy

Appendix A [Quality Policy] shall:

- a) be available and be maintained as documented information;
- b) be communicated, understood and applied within the organization;
- c) be available to relevant interested parties, as appropriate.

## 5.3. Organizational roles, responsibilities and authorities

Top management ensures that the responsibilities and authorities for relevant roles are assigned, communicated and understood within the organization.

Through the use of Appendix C [Organization Chart] and Appendix D [Roles & Responsibilities], top management assigns the responsibility and authority for:

- a) ensuring that our quality management system conforms to the requirements of this International Standard;
- b) ensuring that the processes are delivering their intended outputs;
- c) reporting on the performance of our quality management system and on opportunities for improvement (see 10.1), in particular to top management;
- d) ensuring the promotion of customer focus throughout the organization;
- e) ensuring that the integrity of our quality management system is maintained when changes to the quality management system are planned and implemented.

## 6. Planning

### 6.1. Actions to address risks and opportunities

#### 6.1.1. Consideration and Determination of Risk

When planning for our quality management system, our organization considers the issues referred to in 4.1 and the requirements referred to in 4.2 and sets forth SOP-06 [Risk Management] in order to determine the risks and opportunities that need to be addressed to:

- a) give assurance that our quality management system can achieve its intended result(s);
- b) enhance desirable effects;
- c) prevent, or reduce, undesired effects;
- d) achieve improvement.

#### 6.1.2. Risk Planning

Our organization sets forth SOP-06 [Risk Management] in order to plan:

- a) actions to address these risks and opportunities;
- b) how to:
  - 1) integrate and implement the actions into its quality management system processes (see 4.4);
  - 2) evaluate the effectiveness of these actions.

Actions taken to address risks and opportunities shall be proportionate to the potential impact on the conformity of products and services.

### 6.2. Quality Objectives and planning to achieve them

#### 6.2.1. Establishing Quality Objectives

Our organization has established Appendix B [Quality Objectives] to describe measurements for relevant functions, levels and processes needed for our quality management system.

The Quality Objectives shall:

- a) be consistent with Appendix A [Quality Policy];
- b) be measurable;
- c) take into account applicable requirements;
- d) be relevant to conformity of products and services and to enhancement of customer satisfaction;
- e) be monitored;
- f) be communicated;
- g) be updated as appropriate.

Our organization maintains Appendix B [Quality Objectives] as documented information.

#### **6.2.2.** Planning Quality Objectives

When planning how to achieve our Quality Objectives, our organization determines:

- a) what will be done;
- b) what resources will be required;
- c) who will be responsible;
- d) when it will be completed;
- e) how the results will be evaluated.

#### **6.3.** Planning of changes

When our organization determines the need for changes to our quality management system, the changes shall be carried out in a planned manner (see 4.4).

Our organization considers:

- a) the purpose of the changes and their potential consequences;
- b) the integrity of our quality management system;
- c) the availability of resources;
- d) the allocation or reallocation of responsibilities and authorities.

## **7. Support**

### **7.1. Resources**

#### **7.1.1. General**

Our organization determines and provides the resources needed for the establishment, implementation, maintenance and continual improvement of our quality management system.

Our organization considers:

- a) the capabilities of, and constraints on, existing internal resources;
- b) what needs to be obtained from external providers.

#### **7.1.2. People**

Our organization determines and provides the persons necessary for the effective implementation of our quality management system and for the operation and control of our processes.

#### **7.1.3. Infrastructure**

Our organization determines, provides and maintains the infrastructure necessary for the operation of its processes and to achieve conformity of products and services.

#### **7.1.4. Environment for the operation of processes**

Our organization determines, provides and maintains the environment necessary for the operation of its processes and to achieve conformity of products and services.

#### **7.1.5. Monitoring and measuring resources**

##### **7.1.5.1. General**

As described in SOP-14 [Calibration], our organization determines and provides the resources needed to ensure valid and reliable results when monitoring or measuring is used to verify the conformity of products and services to requirements.

Our organization ensures that the resources provided:

- a) are suitable for the specific type of monitoring and measurement activities being undertaken;
- b) are maintained to ensure their continuing fitness for their purpose.

Our organization retains appropriate documented information as evidence of fitness for purpose of the monitoring and measurement resources.

#### 7.1.5.2. Measurement Traceability

When measurement traceability is a requirement, or is considered by the organization to be an essential part of providing confidence in the validity of measurement results, measuring equipment shall be:

- a) calibrated or verified, or both, at specified intervals, or prior to use, against measurement standards traceable to international or national measurement standards; when no such standards exist, the basis used for calibration or verification shall be retained as documented information;
- b) identified in order to determine their status;
- c) safeguarded from adjustments, damage or deterioration that would invalidate the calibration status and subsequent measurement results.

Our organization determines if the validity of previous measurement results has been adversely affected when measuring equipment is found to be unfit for its intended purpose, and shall take appropriate action as necessary.

#### 7.1.6. Organizational knowledge

Our organization determines the knowledge necessary for the operation of its processes and to achieve conformity of products and services.

This knowledge shall be maintained and be made available to the extent necessary.

When addressing changing needs and trends, our organization considers its current knowledge and determines how to acquire or access any necessary additional knowledge and required updates.

### 7.2. Competence

As described in SOP-08 [Training], our organization:

- a) determines the necessary competence of person(s) doing work under its control that affects the performance and effectiveness of the quality management system;
- b) ensures that these persons are competent on the basis of appropriate education, training, or experience;
- c) where applicable, takes actions to acquire the necessary competence, and evaluates the effectiveness of the actions taken;
- d) retains appropriate documented information as evidence of competence.

### **7.3. Awareness**

Our organization ensures that persons doing work under our organization's control are aware of:

- a) Appendix A [Quality Policy];
- b) relevant measurements established in Appendix B [Quality Objectives];
- c) their contribution to the effectiveness of our quality management system, including the benefits of improved performance;
- d) the implications of not conforming with our quality management system requirements.

### **7.4. Communication**

Our organization determines the internal and external communications relevant to our quality management system, including:

- a) on what we will communicate;
- b) when to communicate;
- c) with whom to communicate;
- d) how to communicate;
- e) who communicates.

### **7.5. Documented Information**

#### **7.5.1. General**

Our organization's quality management system includes:

- a) documented information required by this International Standard;
- b) documented information determined by our organization as being necessary for the effectiveness of our quality management system.

#### **7.5.2. Creating and updating**

As described in SOP-01 [Document Control], when creating and updating documented information, our organization ensures appropriate:

- a) identification and description (e.g. a title, date, author, or reference number);
- b) format (e.g. language, software version, graphics) and media (e.g. paper, electronic);
- c) review and approval for suitability and adequacy.

#### **7.5.3. Control of documented information**

##### **7.5.3.1. Protection and Availability**

As described in SOP-01 [Document Control], documented information required by our quality management system and by this International Standard shall be controlled to ensure:

- a) it is available and suitable for use, where and when it is needed;
- b) it is adequately protected (e.g. from loss of confidentiality, improper use, or loss of integrity).

#### 7.5.3.2. Distribution

As described in SOP-01 [Document Control] and SOP-02 [Record Control], for the control of documented information, our organization addresses the following activities, as applicable:

- a) distribution, access, retrieval and use;
- b) storage and preservation, including preservation of legibility;
- c) control of changes (e.g. version control);
- d) retention and disposition.

Documented information of external origin determined by the organization to be necessary for the planning and operation of the quality management system shall be identified as appropriate, and be controlled as described in SOP-01 [Document Control] .

Documented information retained as evidence of conformity shall be protected from unintended alterations as described in SOP-02 [Record Control].

## **8. Operation**

### **8.1. Operational planning and control**

As described in SOP-11 [Planning] & SOP-13 [Production & Inspection], our organization plans, implements and controls the processes (see 4.4) needed to meet the requirements for the provision of products and services, and to implement the actions determined in Clause 6, by:

- a) determining the requirements for the products and services;
- b) establishing criteria for:
  - 1) the processes;
  - 2) the acceptance of products and services;
- c) determining the resources needed to achieve conformity to the product and service requirements;
- d) implementing control of the processes in accordance with the criteria;
- e) determining, maintaining and retaining documented information to the extent necessary:
  - 1) to have confidence that the processes have been carried out as planned;
  - 2) to demonstrate the conformity of products and services to their requirements.

The output of this planning shall be suitable for our organization's operations.

The organization controls planned changes and reviews the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary.

Our organization ensures that outsourced processes are controlled (see 8.4) as described in SOP-12 [Purchasing & Receiving].

### **8.2. Requirements for products and services**

#### **8.2.1. Customer communication**

As governed by SOP-09 [Contract Review], communication with customers shall include:

- a) providing information relating to products and services;
- b) handling enquiries, contracts or orders, including changes;
- c) obtaining customer feedback relating to products and services, including customer complaints;
- d) handling or controlling customer property;
- e) establishing specific requirements for contingency actions, when relevant.

**8.2.2.** Determining the requirements for products and services

As described in SOP-09 [Contract Review] and SOP-10 [Design & Development], when determining the requirements for the products and services to be offered to customers, our organization ensures that:

- a) the requirements for the products and services are defined, including:
  - 1) any applicable statutory and regulatory requirements;
  - 2) those considered necessary by the organization;
- b) the organization can meet the claims for the products and services it offers.

**8.2.3.** Review of the requirements for products and services**8.2.3.1.** Organizational Ability

As described in SOP-09 [Contract Review], our organization ensures that it has the ability to meet the requirements for products and services to be offered to customers. Our organization conducts a review before committing to supply products and services to a customer, to include:

- a) requirements specified by the customer, including the requirements for delivery and post-delivery activities;
- b) requirements not stated by the customer, but necessary for the specified or intended use, when known;
- c) requirements specified by the organization;
- d) statutory and regulatory requirements applicable to the products and services;
- e) contract or order requirements differing from those previously expressed.

Our organization ensures that contract or order requirements differing from those previously defined are resolved.

The customer's requirements shall be confirmed by the organization before acceptance, when the customer does not provide a documented statement of their requirements.

**8.2.3.2.** Retention of Documentation

As described in SOP-02 [Record Control] our organization retains documented information, as applicable:

- a) on the results of the review;
- b) on any new requirements for the products and services.

**8.2.4.** Changes to requirements for products and services

As described in SOP-09 [Contract Review] our organization ensures that relevant documented information is amended, and that relevant persons are made aware of the changed requirements, when the requirements for products and services are changed.

**8.3.** Design and development of products and services**8.3.1.** General

Our organization has established, implemented and maintains a design and development process as described in SOP-10 [Design & Development] to ensure the subsequent provision of products and services.

**8.3.2.** Design and development planning

As described in SOP-10 [Design & Development], when determining the stages and controls for design and development, our organization considers:

- a) the nature, duration and complexity of the design and development activities;
- b) the required process stages, including applicable design and development reviews;
- c) the required design and development verification and validation activities;
- d) the responsibilities and authorities involved in the design and development process;
- e) the internal and external resource needs for the design and development of products and services;
- f) the need to control interfaces between persons involved in the design and development process;
- g) the need for involvement of customers and users in the design and development process;
- h) the requirements for subsequent provision of products and services;
- i) the level of control expected for the design and development process by customers and other relevant interested parties;
- j) the documented information needed to demonstrate that design and development requirements have been met as defined in SOP-02 [Record Control].

**8.3.3. Design and development inputs**

As described in SOP-10 [Design & Development], our organization determines the requirements essential for the specific types of products and services to be designed and developed. Our organization considers:

- a) functional and performance requirements;
- b) information derived from previous similar design and development activities;
- c) statutory and regulatory requirements;
- d) standards or codes of practice that the organization has committed to implement;
- e) potential consequences of failure due to the nature of the products and services.

Inputs shall be adequate for design and development purposes, complete and unambiguous.

Conflicting design and development inputs shall be resolved.

Our organization retains documented information on design and development inputs as defined in SOP-02 [Record Control].

**8.3.4. Design and development controls**

As described in SOP-10 [Design & Development], our organization applies controls to the design and development process to ensure that:

- a) the results to be achieved are defined;
- b) reviews are conducted to evaluate the ability of the results of design and development to meet requirements;
- c) verification activities are conducted to ensure that the design and development outputs meet the input requirements;
- d) validation activities are conducted to ensure that the resulting products and services meet the requirements for the specified application or intended use;
- e) any necessary actions are taken on problems determined during the reviews, or verification and validation activities;
- f) documented information of these activities is retained as defined in SOP-02 [Record Control].

**8.3.5. Design and development outputs**

As described in SOP-10 [Design & Development], our organization ensures that design and development outputs:

- a) meet the input requirements;
- b) are adequate for the subsequent processes for the provision of products and services;
- c) include or reference monitoring and measuring requirements, as appropriate, and acceptance criteria;
- d) specify the characteristics of the products and services that are essential for their intended purpose and their safe and proper provision.

Our organization retains documented information on design and development outputs as defined in SOP-02 [Record Control].

**8.3.6. Design and development changes**

As described in SOP-10 [Design & Development], our organization identifies, reviews and controls changes made during, or subsequent to, the design and development of products and services, to the extent necessary to ensure that there is no adverse impact on conformity to requirements.

As defined in SOP-10 [Design & Development] and SOP-02 [Record Control], our organization retains documented information on:

- a) design and development changes;
- b) the results of reviews;
- c) the authorization of the changes;
- d) the actions taken to prevent adverse impacts.

## 8.4. Control of externally provided processes, products and services

### 8.4.1. General

As described in SOP-12 [Purchasing & Receiving], our organization ensures that externally provided processes, products and services conform to requirements.

Our organization determines the controls to be applied to externally provided processes, products and services when:

- a) products and services from external providers are intended for incorporation into our organization's own products and services;
- b) products and services are provided directly to the customer(s) by external providers on behalf of our organization;
- c) a process, or part of a process, is provided by an external provider as a result of a decision by the organization.

As described in SOP-12 [Purchasing & Receiving], our organization determines and applies criteria for the evaluation, selection, monitoring of performance, and re-evaluation of external providers, based on their ability to provide processes or products and services in accordance with requirements. Our organization retains documented information of these activities and any necessary actions arising from the evaluations as defined in SOP-02 [Record Control].

### 8.4.2. Type and extent of control

As described in SOP-12 [Purchasing & Receiving], our organization ensures that externally provided processes, products and services do not adversely affect our organization's ability to consistently deliver conforming products and services to its customers.

Our organization shall:

- a) ensure that externally provided processes remain within the control of its quality management system;
- b) define both the controls that it intends to apply to an external provider and those it intends to apply to the resulting output;
- c) take into consideration:
  - 1) the potential impact of the externally provided processes, products and services on the organization's ability to consistently meet customer and applicable statutory and regulatory requirements;
  - 2) the effectiveness of the controls applied by the external provider;
- d) determine the verification, or other activities, necessary to ensure that the externally provided processes, products and services meet requirements.

### 8.4.3. Information for external providers

As described in SOP-12 [Purchasing & Receiving], our organization ensures the adequacy of requirements prior to their communication to the external provider.

Our organization communicates to external providers its requirements for:

- a) the processes, products and services to be provided;
- b) the approval of:
  - 1) products and services;
  - 2) methods, processes and equipment;
  - 3) the release of products and services;
- c) competence, including any required qualification of persons;
- d) the external providers' interactions with our organization;
- e) control and monitoring of the external providers' performance to be applied by our organization;
- f) verification or validation activities that our organization, or our customer, intends to perform at the external providers' premises.

## **8.5. Production and service provision**

### **8.5.1. Control of production and service provision**

As described in SOP-13 [Production & Inspection], our organization implements production and service provision under controlled conditions.

Controlled conditions shall include, as applicable:

- a) the availability of documented information that defines:
  - 1) the characteristics of the products to be produced, the services to be provided, or the activities to be performed;
  - 2) the results to be achieved;
- b) the availability and use of suitable monitoring and measuring resources;
- c) the implementation of monitoring and measurement activities at appropriate stages to verify that criteria for control of processes or outputs, and acceptance criteria for products and services, have been met;
- d) the use of suitable infrastructure and environment for the operation of processes;
- e) the appointment of competent persons, including any required qualification;
- f) the validation, and periodic revalidation, of the ability to achieve planned results of the processes for production and service provision, where the resulting output cannot be verified by subsequent monitoring or measurement;
- g) the implementation of actions to prevent human error;
- h) the implementation of release, delivery and post-delivery activities.

### **8.5.2. Identification and traceability**

As described in SOP-13 [Production & Inspection], our organization shall use suitable means to identify outputs when it is necessary to ensure the conformity of products and services.

Our organization identifies the status of outputs with respect to monitoring and measurement requirements throughout production and service provision.

Our organization controls the unique identification of the outputs when traceability is a requirement, and shall retain the documented information necessary to enable traceability as described in SOP-02 [Record Control].

### **8.5.3. Property belonging to customers or external providers**

Our organization exercises care with property belonging to customers or external providers while it is under our organization's control or being used by the organization.

The organization identifies, verifies, protects and safeguards customers' or external providers' property provided for use or incorporation into the products and services.

When the property of a customer or external provider is lost, damaged or otherwise found to be unsuitable for use, our organization shall report this to the customer or external provider and retain documented information on what has occurred as described in SOP-02 [Record Control].

**8.5.4. Preservation**

Our organization preserves the outputs during production and service provision, to the extent necessary to ensure conformity to requirements.

**8.5.5. Post-delivery activities**

Our organization shall meet requirements for post-delivery activities associated with the products and services.

In determining the extent of post-delivery activities that are required, our organization considers:

- a) statutory and regulatory requirements;
- b) the potential undesired consequences associated with its products and services;
- c) the nature, use and intended lifetime of its products and services;
- d) customer requirements;
- e) customer feedback.

**8.5.6. Control of changes**

As described in SOP-13 [Production & Inspection], our organization reviews and control changes for production or service provision, to the extent necessary to ensure continuing conformity with requirements.

Our organization retains documented information describing the results of the review of changes, the person(s) authorizing the change, and any necessary actions arising from the review as described in SOP-02 [Record Control].

**8.6. Release of products and services**

As described in SOP-13 [Production & Inspection], our organization implements planned arrangements, at appropriate stages, to verify that the product and service requirements have been met.

The release of products and services to the customer shall not proceed until the planned arrangements have been satisfactorily completed, unless otherwise approved by a relevant authority and, as applicable, by the customer.

Our organization retains documented information on the release of products and services. The documented information shall include:

- a) evidence of conformity with the acceptance criteria;
- b) traceability to the person(s) authorizing the release.

## **8.7. Control of nonconforming outputs**

### **8.7.1. Unintended use**

As described in SOP-04 [Control of Nonconforming Product], our organization ensures that outputs that do not conform to their requirements are identified and controlled to prevent their unintended use or delivery.

Our organization shall take appropriate action based on the nature of the nonconformity and its effect on the conformity of products and services. This shall also apply to nonconforming products and services detected after delivery of products, during or after the provision of services.

Our organization deals with nonconforming outputs in one or more of the following ways:

- a) correction;
- b) segregation, containment, return or suspension of provision of products and services;
- c) informing the customer;
- d) obtaining authorization for acceptance under concession.

Conformity to the requirements shall be verified when nonconforming outputs are corrected.

### **8.7.2. Retention of Documentation**

As described by SOP-02 [Record Control], our organization retains documented information that:

- a) describes the nonconformity;
- b) describes the actions taken;
- c) describes any concessions obtained;
- d) identifies the authority deciding the action in respect of the nonconformity.

## **9. Performance evaluation**

### **9.1. Monitoring, measurement, analysis and evaluation**

#### **9.1.1. General**

As described in Appendix B [Quality Objectives], our organization determines:

- a) what needs to be monitored and measured;
- b) the methods for monitoring, measurement, analysis and evaluation needed to ensure valid results;
- c) when the monitoring and measuring shall be performed;
- d) when the results from monitoring and measurement shall be analyzed and evaluated.

Our organization shall evaluate the performance and the effectiveness of the quality management system as described in SOP-07 [Management Review].

Our organization retains appropriate documented information as evidence of the results as described in SOP-02 [Record Control].

#### **9.1.2. Customer satisfaction**

Our organization monitors customers' perceptions of the degree to which their needs and expectations have been fulfilled. Our organization determines the methods for obtaining, monitoring and reviewing this information.

#### **9.1.3. Analysis and evaluation**

As described in SOP-07 [Management Review], our organization analyzes and evaluates appropriate data and information arising from monitoring and measurement.

The results of analysis shall be used to evaluate:

- a) conformity of products and services;
- b) the degree of customer satisfaction;
- c) the performance and effectiveness of the quality management system;
- d) if planning has been implemented effectively;
- e) the effectiveness of actions taken to address risks and opportunities;
- f) the performance of external providers;
- g) the need for improvements to the quality management system.

### **9.2. Internal Audit**

#### **9.2.1. Conduct of Internal Audits**

As described in SOP-03 [Internal Audit], our organization conducts internal audits at planned intervals to provide information on whether the quality management system:

- a) conforms to:
  - 1) our organization's own requirements for its quality management system;
  - 2) the requirements of this International Standard;
- b) is effectively implemented and maintained.

### **9.2.2. Audit Program**

As described in SOP-03 [Internal Audit], our organization:

- a) plans, establishes, implements and maintains an audit program including the frequency, methods, responsibilities, planning requirements and reporting, which shall take into consideration the importance of the processes concerned, changes affecting the organization, and the results of previous audits;
- b) defines the audit criteria and scope for each audit;
- c) selects auditors and conduct audits to ensure objectivity and the impartiality of the audit process;
- d) ensures that the results of the audits are reported to relevant management;
- e) takes appropriate correction and corrective actions without undue delay;
- f) retains documented information as evidence of the implementation of the audit program and the audit results as described in SOP-02 [Record Control].

## **9.3. Management review**

### **9.3.1. General**

Top management shall review our organization's quality management system, at planned intervals, to ensure its continuing suitability, adequacy, effectiveness and alignment with the strategic direction of the organization as described in SOP-07 [Management Review].

### **9.3.2. Management review inputs**

As described in SOP-07 [Management Review], management review shall be planned and carried out taking into consideration:

- a) the status of actions from previous management reviews;
- b) changes in external and internal issues that are relevant to the quality management system;
- c) information on the performance and effectiveness of the quality management system, including trends in:
  - 1) customer satisfaction and feedback from relevant interested parties;
  - 2) the extent to which Quality Objectives have been met;
  - 3) process performance and conformity of products and services;
  - 4) nonconformities and corrective actions;

- 5) monitoring and measurement results;
- 6) audit results;
- 7) the performance of external providers;
- d) the adequacy of resources;
- e) the effectiveness of actions taken to address risks and opportunities (see 6.1);
- f) opportunities for improvement.

### **9.3.3.** Management review outputs

The outputs of the management review shall include decisions and actions related to:

- a) opportunities for improvement;
- b) any need for changes to the quality management system;
- c) resource needs.

Our organization retains documented information as evidence of the results of management reviews as described in SOP-02 [Record Control].

## 10. Improvement

### 10.1. General

Our organization determines and selects opportunities for improvement and implements any necessary actions needed to meet customer requirements and enhance customer satisfaction.

These shall include:

- a) improving products and services to meet requirements as well as to address future needs and expectations;
- b) correcting, preventing or reducing undesired effects;
- c) improving the performance and effectiveness of the quality management system.

### 10.2. Nonconformity and corrective action

#### 10.2.1. Control and Correction

As described in SOP-05 [Corrective Action], when nonconformity occurs, including those arising from complaints, our organization shall:

- a) react to the nonconformity and, as applicable:
  - 1) take action to control and correct it;
  - 2) deal with the consequences;
- b) evaluate the need for action to eliminate the cause(s) of the nonconformity, in order that it does not recur or occur elsewhere, by:
  - 1) reviewing and analyzing the nonconformity;
  - 2) determining the causes of the nonconformity;
  - 3) determining if similar nonconformities exist, or could potentially occur;
- c) implement any action needed;
- d) review the effectiveness of any corrective action taken;
- e) update risks and opportunities determined during planning, if necessary;
- f) make changes to the quality management system, if necessary.

Corrective actions shall be appropriate to the effects of the nonconformities encountered.

---

**10.2.2. Retention of Documentation**

As described in SOP-02 [Record Control], our organization shall retain documented information as evidence of:

- a) the nature of the nonconformities and any subsequent actions taken;
- b) the results of any corrective action.

**10.3. Continual improvement**

Our organization shall continually improve the suitability, adequacy and effectiveness of the quality management system.

Our organization considers the results of analysis and evaluation and the outputs from management review, in order to determine if there are needs or opportunities that shall be addressed as part of continual improvement.
